

“Engineering and manufacturing environments are primed to adopt technologies that enhance competitiveness and productivity through better product design, process workflow and management. Edison’s long track record in guiding companies toward premium exits underscores our experience, value-add and ongoing interest.”

— John Martinson, Managing Partner
609-873-9201 | jmartinson@edisonventure.com

Edison targets Engineering / Manufacturing solutions that target productivity enhancement, manufacturing execution and information management. We seek investment opportunities where Edison’s wealth of experience and network of contacts accelerate growth and build value for company’s stakeholders.
